PROJECTS:

Project 1: **DEVM(Digital Electronic Voting Machine)(Working)**

Description: IT is a web-based application developed using HTML, CSS, JavaScript, and Python Flask to make voting simple and accessible. It features email verification, candidate details, and secure vote submission with a **"One Aadhaar, One Vote"** policy to ensure fair elections. A special voice-based voting system allows visually impaired and disabled users to vote independently using speech recognition. The platform is responsive, user-friendly, and promotes transparent digital elections.

Project 2: **Smart Calculator(https://neerajgeek510.github.io/Calculator/)**

Description: Smart Calculator project with an advanced Age Calculator feature!
Now, users can enter their Date of Birth and instantly get their exact age in years, months, and days.

Project 3: **Landing Page (https://neerajgeek510.github.io/Landing-page/)**

Description: Developed a responsive landing page using HTML and CSS to showcase my skills, projects, and professional profile.
